

We are one of the oil and gas industry's most reliable suppliers of high-quality rubber and plastic seals.

We are a full service technical distributor, offering precision machining of plastics and metals, design technical assistance, in-depth inspection, kitting a large inventory and an on-site inventory managed program.

Quality You Expect

Our quality assurance program — backed by our own highly experienced staff and some of the world's most respected suppliers — gives you peace of mind. Everything we carry meets ISO and QS safety and quality standards.

We also invest a great deal of time and energy to bring you the latest and most advanced designs and technology, from manufacturers around the world.

Manufacturing Capabilities

Custom designed elastomeric and plastic components for Oil and Gas extreme environments

CNC Machining: "In House" machining of thermo plastics, rubber and metal

Vulcanizing

Spring Loaded Seals

Custom parts machined to customer drawing
